NOTES ON THE KAI-YU HSU PAPERS
General Introduction

Kai-yu Hsu was chairman of the Department of World Literature during 1968 and early 1969. He collected letters, flyers, memoranda, other papers related and unrelated to the strike, and a sound tape of a speech by S.I. Hayakawa. After a number of these materials were donated by his widow, the collection was itemized and entered into a database during December and January, 1998-1999. The papers consist currently of 197 items in 13 file folders.

Organization of Materials

The materials now in folders 87-1, -2, -3 and -4 were originally in a single file folder, and were separated out as more copies were found of the documents in folders 1 and 2. When materials were added to the collection in December 1998, an attempt was made to put copies of the same document together, and this resulted in some reshuffling of files and materials.

Where possible, the original order was kept. Exceptions to this rule were: (1) duplicate documents were found and placed with the first or more logical appearance of the document; (2) some materials on the campus convocations (November 1968) were separated out of an overfull folder and placed together. In many cases, items do not appear in chronological order within the folders, and some items appear quite out of place (a carbon copy of a letter in the ditto masters folder, for instance). However, where it was not quite clear where a given item should be placed other than where it was found, it was not removed.

Database

These papers were the first to be entered into the “Strikepro” database created for the Strike Collection. A complete printout of the collection appears in the Strike Collection binder in alphabetical order under “Hsu.” The “names” field is not printed out, and must be consulted in the FileMaker Pro database.

There is a great deal of diversity in how several entities were named in the materials. In general, “Black Studies Program” was used in this database, although this entity might have been referred to as “Black Studies Curriculum,” “Black Studies Department,” etc. President Robert Smith was referred to by variations on his name, and there were occasions when it was not clear when entering the data which Mr. “Smith” was meant, so only “Smith” was used. The name of Clay Putman is generally in this form, but may have been entered as “Putnam,” since documents differ in the spelling of his name.
